LUCAS ANDRADE DA SILVA (SAMPLE)

Software Engineer | Java • Python • Flutter • SQL | AI-Assisted Engineering

São Paulo, Brazil (Remote B2B / Worldwide) • (+55) 11 98765-4321 • lucas.sample.dev@example.com • linkedin.com/in/sample-dev • github.com/sample-dev

PROFESSIONAL SUMMARY

Software Engineer specializing in backend APIs, mobile development, and modern **AI-assisted software engineering workflows**. Experienced in designing scalable RESTful microservices, relational database schemas, and responsive mobile applications. Strong technical foundation in **Java (Spring Boot), Python, Flutter/Dart, and SQL**, with proven hands-on capability in technical troubleshooting, CI/CD automation, and rapid feature implementation under clean architecture principles.

TECHNICAL SKILLS

Languages & Frameworks: Java (OOP, Spring Boot, Hibernate), Python (FastAPI, Flask), Dart & Flutter, JavaScript, SQL (PostgreSQL, MySQL)

AI-Assisted Engineering: Agentic Workflows, Automated Test Harnesses, Prompt Architecture, Structured Output Parsing

Tools & Cloud / DevOps: Git, GitHub Actions, Docker, Linux, REST APIs, Postman, CI/CD Pipelines, PowerShell

Engineering Practices: Clean Architecture, Test-Driven Principles, Object-Oriented Design, System Troubleshooting

FEATURED PROJECTS

Retail E-Commerce Platform & Inventory Management API — **Java, Spring Boot, React, PostgreSQL**

- Architected high-throughput REST API for product catalog management, order processing, and dynamic inventory sync.
- Implemented secure JWT authentication, query pagination, and automated Swagger/OpenAPI documentation.
- Source Code: github.com/sample-dev/ecommerce-backend

Mobile Health & Daily Routine Assistant — **Flutter, Dart, SQLite, Clean Architecture**

- Engineered cross-platform mobile app (Android/iOS) with offline-first SQLite persistence, scheduled alerts, and reactive state management.
- Structured layered architecture (Data, Domain, Presentation) ensuring decoupled modules and high test coverage.
- Source Code: github.com/sample-dev/health-tracker

JobHunter AI — Autonomous Job Discovery & Application Engine — **Python, Playwright, REST APIs**

- Designed automated Python engine that queries public job APIs, scores postings against developer profiles, and drafts tailored applications.
- Automated supervised ATS form completion and custom cover letter generation with Playwright.
- Source Code: github.com/sample-dev/job-hunter-ai

WORK EXPERIENCE

TechCorp Global Solutions — **01/2025 – Present**
Software Engineering & Support Intern — *São Paulo, Brazil (Hybrid / Remote)*

- Delivered technical support for enterprise management systems (ERP), performing Linux log diagnostics and SQL query optimization.
- Authored automation scripts in Python for batch data transformation and reporting, reducing manual operational tasks by 35%.

Express Logistics & Retail — **06/2024 – 12/2024**
IT Operations Associate (Backup Technical Support) — *São Paulo, Brazil*

- Provided first-level support for POS retail terminals, automated peripherals, and local network connectivity in a high-volume retail environment.
- Collaborated with store IT administrators during system maintenance windows and incident triage.

EDUCATION

Associate Degree in Systems Analysis and Software Development — **2024 – 2026 (Expected)**
University of Technology — *In Progress*

LANGUAGES

Portuguese: Native • **English:** Advanced / Professional Working Proficiency (Fluent written & spoken technical communication)
